re: Transmission Power Line  
ACT/007/007

A new power replacement line is to be installed at the Sunnyside mine complex by our own personnel. It will run from the UP&L existing central metering station (in SE $\frac{1}{4}$ , NE $\frac{1}{4}$ , Section 7, T15S, R14E, SLB&M) north to a Branch fuse disconnect station (in NW $\frac{1}{4}$ , NW $\frac{1}{4}$ , Section 5, T15S, R14E, SLB&M) as shown on the enclosed Vicinity Map. The power line will be constructed in conformance with UMC 817.9(c) and REA Bulletin 61-10 as detailed on the enclosed plans during the months of July & August, 1981.

These plans are sent for your review and approval. If you need additional copies or have any questions, please contact me.

Sincerely,

John S. Huefner, PE  
Engineer
