RE: NAOC on Sediment Control Structures
NAOC on Coarse Refuse Roads
Great National Corporation
Crusher and Stockpile Site
Sunnyside Complex
ACT/007/007
Carbon County, Utah

Dear Mr. Huefner:

This letter is intended to document the substance of our recent phone conversation (week of December 7). You may consider this letter as a termination of the NAOC Form dealing with the implementation of straw bale filter dikes near the manshaft and at No. 2 fan. Also, please consider this as official record of the extension until December 18, 1981, of the NAOC Form dealing with erosion and sediment on roads where coarse refuse has been utilized.

Also discussed was compliance work directed at drainage control at the site of the Great National Corporation crusher and stockpile site. Problems were discussed during a December 4, 1981, inspection. As you indicated in your September 1, 1981, letter Kaiser has ultimate responsibility for this site. Hopefully, compliance in this area will be upgraded in the near future and prior to the next inspection. If I may be of any help please don't hesitate to call.

Sincerely,

THOMAS L. PORTLE
