Sunnyside Mines  
ACT/007/007 - 3

Dear Tom,

In response to your letter of 12-13-82, Kaiser Steel Corporation hereby accepts the stipulations as outlined for the Manshaft Sediment Pond per:

1. undisturbed drainage ditch conforming to UMC817.43.
2. proper maintenance of ditches & culvert.
3. sediment pond of 15,424cf storage volume and install discharge energy dissipators.
4. Sediment levels to be marked on pond embankment.

Please note a typo error in undisturbed acreage. Your letter indicates 32.8 acres undisturbed, where the map of 10-25-82 shows two areas of 20.3 acres & 13.2 acres for a total of 33.5 acres if added together.

Construction approval for the manshaft sediment pond is appreciated; however, due to the season and extreme weather conditions, the pond construction may be postponed until warmer weather (late spring, early summer) .

Sincerely,

John S. Huefner, PE.  
Civil Engineer
