Inspection Memo  
to Coal File

RE: Kaiser Steel Corporation  
Sunnyside Complex  
ACT/007/007, Folder #7  
Carbon County, Utah

A partial inspection was conducted on May 23, 1984, by Barton Kale of the Division. The inspector was accompanied by Tom Wright of the Division and Doug Pearce of Kaiser Steel Corporation.

A tour of the mine site revealed no major problems, although some areas were discussed. The straw dam at the permit boundary, below the course refuse pile will be reconstructed by next month. Other matters discussed include the certification of the Pasture Pond (completed) and the fact that all the erosion work on the Class III roads has been finished.
