Re: Information On Sunnyside Mine Permit Boundary Incidental Change

Dear Lowell:

I want to thank you and the rest of the Utah Division of Oil, Gas, & Mining (DOGM) staff for the time spent with Kaiser Coal personnel yesterday. The positive atmosphere of the meeting was refreshing.

As you will recall from our meeting yesterday, Kaiser Coal promised Utah DOGM information pertaining to the exact area requested in the incidental boundary change. Enclosed are two maps showing the information you requested. One map shows the mining progress to date in Federal Lease Tract SLO68754. The other map shows the surface topography over the proposed incidental boundary change. In addition to the two maps, included is a table showing approximate annual tonnage from Federal Lease Tract SLO68754.

Federal Lease No. SLO68754 was originally issued to U. S. Steel Corporation on June 1, 1951.

I hope this completes the information you need. Please contact me or Marty Holmes if we can be of further assistance in this matter.

Sincerely,

Clyde Borrell  
Vice President  
Engineering
