**DIVISION OF
 OIL, GAS & MINING**

Dear Mr. Whitehead:

Please find enclosed the following information relating to Kaiser Coal Company's permit application:

- (1) Map showing locations of all springs and seeps surveyed in October, 1985 and June, 1986. Springs and surface water sites proposed for baseline monitoring are also shown on this map.
- (2) Data sheets summarizing water quality, quantity, usage and geologic occurrence for all springs and seeps surveyed.
- (3) A monitoring plan showing proposed monitoring sites, duration of monitoring, frequency of monitoring, and proposed parameters for water quality analysis.

We would like to meet with you, Jim Fricke, and Rick Smith after the three of you have reviewed the enclosed information. I have scheduled a meeting with Jim Fricke and Rick Smith for July 23. At that time, we would like to have this monitoring plan, with any modifications DOGM may consider necessary, approved so that we can begin monitoring before the end of July. This is necessary so that we can get at least the four required spring monitoring sessions completed while the area is accessible. If the enclosed information is not sufficient for DOGM's reviewing needs, please let me know as soon as possible.

Thank you for your assistance.

Sincerely,

Brian W. Buck
