

ACT/007/007

July 13, 1987

TO: John Whitehead, Permit Supervisor

FROM: James R. Fricke, Reclamation Hydrologist *JRF*

RE: Temporary Industrial Waste Disposal, Kaiser Coal Corporation, Sunnyside Mines, ACT/007/007, Folder #2, Carbon County, Utah

The operator's request for relocating the temporary industrial waste depository is adequate from a hydrological viewpoint. The area designated on Plate III-1A ultimately drains to an existing sediment pond. However, the operator's response should be formatted such that it can be inserted (with the proposed changes) into the approved MRP.

Plate III-1A should be modified to demonstrate that the waste disposal area is contained in a disturbed area.
