The Division received your application for the MRP permit amendment referenced above on February 26, 1987. The application was reviewed by the Division's technical staff and the plan has been determined technically complete. The Division hereby approves of the permit change with the following condition.

Please provide fourteen (14) copies of the approved plans, including appropriate text and an updated map (Plate III-3) showing the revised underground water monitoring locations. The plans should be formatted as replacement pages to allow direct insertion into the file copies of the approved mining and reclamation plan.

If possible, please forward the requested copies by April 23, 1987. Thank you for your patience and cooperation in completing this permitting activity. Should you have questions or need additional information, please call me or John Whitehead, at your convenience.
