RE: Sunnyside Fuels PAP Review, Kaiser Coal Corporation,
Sunnyside Mine, ACT/007/007, Folder #2, Carbon County,
Utah

A cursory review of the PAP was performed to determine if the mine plan had major completeness deficiencies. Listed below are major hydrology items that need to be addressed:

1. A detailed reclamation plan is required for all hydrologic structures.
2. The Borrow Area sediment pond must be included in the PAP.
3. A specific water monitoring plan is required.

The PAP contains irrelevant information on mining-related impacts at the Sunnyside Mine. Hydrologic resource descriptions in the PAP are outdated and should reflect current knowledge of the hydrologic regime.
