Dear Pamela:

Re: Permit Amendment for Inclusion of No. 2 Trestle Area within the Lower No. 2 Canyon Sediment Pond Drainage Area.

Sunnyside Mines requests a Permit Amendment to include No. 2 Canyon Trestle Disturbed Area Drainage Area within Lower No. 2 Canyon Sediment Pond Drainage Area. The area is approximately 0.7 acres in size, increasing the pond disturbed area drainage from 6.32 acres to 7.02 acres. Lower No. 2 Canyon Sediment Pond adequately captures and discharges increased drainage area without any modifications to the existing pond.

The area was considered for status as an Alternate Sediment Control Area using Best Technology Currently Available.

The area drains directly into No. 2 Canyon using the existing vegetation for sediment control.

The requested addition to the drainage area, as described more fully in the attached Application For Permit Amendment, is approximately 0.1% of the total disturbed area. The modifications require the construction of a small diversion berm to control the water flow, and the installation of a 6-inch CMP culvert.

The surface land is owned and controlled by Sunnyside Coal Company. All activities are within the mine permit boundaries and within existing disturbed areas.

Thank you for your prompt attention to this Permit Amendment request.

Sincerely,

A handwritten signature in cursive script that reads "Gary Gray".

Gary Gray
Chief Mine Engineer
