Dear Pam:

Re: Modification of NOVs N93-32-3-8, 2 of 8 (Disturbed Area Drainage) and N93-32-3-8, 8 of 8 (Drainage Controls)

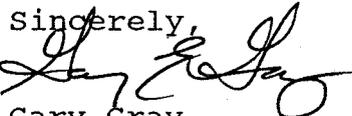

SCC requests a Modification of the above NOVs to allow for the Division review of SCC's plans for abatement, and to perform the work on the ground.

Please note that the Abatement Date for the above NOVs is 11/22/93. As of that date, the Division will have received an Abatement Plan in the form of designs and maps for each of the NOVs.

Please also note that, given the scope of the abatement measures required, the Division will need to conduct a comprehensive review. This review will reasonably be completed by early 1994. Additionally, please consider that the weather conditions at the time of Division approval may make field work extremely difficult.

In order to allow time for Division review, and subsequently to perform the field work necessary to terminate the above NOVs, SCC requests that the Abatement Time be modified to allow field work to be completed within 60 days of Division approval of the Abatement Plan.

I trust that this Request for Modification will meet with your approval. Please call if you have any further questions or concerns.

Sincerely,

Gary Gray
Chief Mine Engineer
