PERMIT NUMBER: ACT/007/007

DATE OF INSPECTION: May 10, 1994

(Comments are Numbered to Correspond with Topics Listed Above)

GENERAL COMMENTS:

Wayne Western, Jeff Porter and Bob Welch (OSM-Denver) were on site during the inspection. The purpose of their visit was to learn the operation and application of the Global Positioning System (GPS). This surveying tool will be used to determine the amount of mine related disturbance at the Sunnyside Coal Mine.

4. HYDROLOGIC BALANCE:
 - b. SEDIMENT PONDS AND IMPOUNDMENTS

The Hoist House Sediment Pond was observed. The following tasks have been completed since the last state inspection: the inlet culvert has been uncovered; concrete blocks have been placed below the outlet of the culvert; the two old culverts on top of the south embankment of the pond have been removed. As-built surveys of the pond have not been received to date. Mr. Leonard informed me that an extension request would be FAXED to the Division on May 11, 1994.

9. PROTECTION OF FISH, WILDLIFE AND RELATED ENVIRONMENTAL VALUES

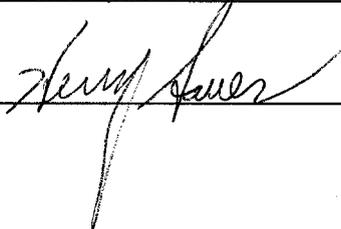

Mr. Darrel Leonard was instructed to dispose of all the used oil and other unknown substances contained the 55-gallon drums (See March 1994 State Inspection Report). Mr. Leonard has been made fully aware that disposal of said material must comply with all applicable state and federal regulations for solid and liquid waste disposal. The Division's position relative to the Spill Prevention Control and Countermeasure (SPCC) Plan requirements and noncoal waste disposal requirements is pending.
