PERMIT NUMBER: ACT/007/007

DATE OF INSPECTION: November 30, 1995

(Comments are Numbered to Correspond with Topics Listed Above)

4a. **HYDROLOGIC BALANCE: DIVERSIONS**

The entire site has not been maintained since the mine closed last summer. Some of the diversions within the permit area are beginning to show signs of erosion from lack of maintenance due to siltation. At this time the site was still functional.

4b. **HYDROLOGIC BALANCE: SEDIMENT PONDS AND IMPOUNDMENTS**

Inspection of the sediment ponds was performed. Although the Price area has received recent snow and rain the entire site was dry and no water was observed in any of the sediment ponds.

4c. **HYDROLOGIC BALANCE: OTHER SEDIMENT CONTROL MEASURES**

Some of the silt fences are beginning to deteriorate. These silt fences will probably become ineffective this winter depending on the amount of precipitation received.

5. **EXPLOSIVES**

The explosive magazine was locked. A transport box for explosives was observed adjacent to the vault and was empty.

8. **NONCOAL WASTE**

The non-coal waste disposal area remains open. Some trash and garbage was observed scattered throughout the mine site.

16. **ROADS: DRAINAGE CONTROLS**

Several of the diversions associated with the roads are beginning to show wear.
