DEPARTMENT OF NATURAL RESOURCES

MICHAEL R. STYLER
Executive Director

Division of Oil, Gas and Mining

JOHN R. BAZA
Division Director

Inspection Report

Permit Number:	C0070007
Inspection Type:	COMPLETE
Inspection Date:	Tuesday, July 15, 2014
Start Date/Time:	7/15/2014 10:00:00 AM
End Date/Time:	9/4/2014 4:00:00 PM
Last Inspection:	Saturday, August 17, 2013

Representatives Present During the Inspection:
OGM Steve Demczak

Inspector: Steve Demczak

Weather: Sunny, 90's

InspectionID Report Number: 3904

Accepted by: JHELFRIC
7/22/2014

Permitee: **SUNNYSIDE COAL CO**

Operator: **SUNNYSIDE COAL CO**

Site: **SUNNYSIDE MINE**

Address: ,

County: **CARBON**

Permit Type: **PERMANENT COAL PROGRAM**

Permit Status: **FORFEITURE**

Current Acreages

287.40	Total Permitted
287.40	Total Disturbed
	Phase I
	Phase II
	Phase III

Mineral Ownership

- Federal
- State
- County
- Fee
- Other

Types of Operations

- Underground
- Surface
- Loadout
- Processing
- Reprocessing

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The building at the Sunnyside reclaim site is in total disrepair. The buildings have been vandalized countless times. Windows are broken and doors to building are open. The Division gave this portion of Sunnyside Mine to a company and has given Phase III bond release as an Industrial site.

This site has been reclaimed by the Division and was completed in 2000. The majority land is covered with mostly sage brush. There are other areas that have grasses. I did not see any major sites of erosion and the reclaimed lands appear to be stable. I did not notice any off site impacts. I recommend this site to be release from the Divisions control. I do not think any further inspections are required. The Division should take step for total release of this property and no more inspections. There are no off site impacts.

REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

1. Substantiate the elements on this inspection by checking the appropriate performance standard.
 - a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable.
 - b. For PARTIAL inspections check only the elements evaluated.
2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
3. Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
4. Provide a brief status report for all pending enforcement actions, permit conditions, Divison Orders, and amendments.

1. Permits, Change, Transfer, Renewal, Sale

The Division reclaimed the Sunnyside mine except for lands that received Phase III bond release for use as an Industrial site. The Industrial site has never been used. The Division started reclamation in 1997 and was completed in year 2000.

3. Topsoil

It appears all topsoil was used in reclamation. The Sunnyside Mine was a Pre-law site and very little topsoil was saved. There has been some minor erosion that has taken places. The sediment is captured within the reclaim area.

4.a Hydrologic Balance: Diversions

The diversions were stable with minor erosion in places. Some sediment has been deposited within the diversions.

4.c Hydrologic Balance: Other Sediment Control Measures

The site was pocked for sediment control.

7. Coal Mine Waste, Refuse Piles, Impoundments

The slurry piles and refuse piles were transfer to Sunnyside Co-Gen. Sunnyside Co-Gen has a DOGM permit for these areas and is mining them.

8. Noncoal Waste

The reclaimed areas are generally clear of non-coal waste materials.

10. Slides and Other Damage

No slides were noticed during the inspection.

12. Backfilling And Grading

The site was backfilled and graded.

13. Revegetation

The majority land is covered with mostly sage brush. There are other areas that have grasses.

18. Support Facilities, Utility Installations

The building at the Sunnyside reclaim site is in total disrepair. The buildings have been vandalized countless times. Windows are broken and doors to building are open. The roof of the shop building and bath house appear to be falling in. The Division gave this portion of Sunnyside Mine to a company and given Phase III bond release as an Industrial site.
