**Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:**

This site has been reclaimed by the Division and was completed in 2000. The majority land is covered with mostly sage brush. There are other areas that have grasses. I did not see any major sites of erosion and the reclaimed lands appear to be stable. I did not notice any off site impacts. I recommend this site to be release from the Divisions control. I do not think any further inspections are required.

The land owner had removed the shop and bathhouse. The only building standing is the office complex. All foundations are in place and not remove. This area has phase III bond release and is not under the control of the Division.

**2. Signs and Markers**

I did not see any identification signs on the property.

**3. Topsoil**

The area was covered with topsoil. I do not know if all the soil was use by AML. There is abundant of sage brush and some grasses growing on the reclaim site. I do not know what the seed mix was use by AML.

**4.a Hydrologic Balance: Diversions**

The diversions were preforming. Some have sediment within. I did not see any major erosion.

**10. Slides and Other Damage**

I did not notice any slides or other damages.
