Re: Blazon #3 Drill Hole CEP/007/009

Dear Mr. Tetting:

As per our Notice of Intention to Commence Coal Exploration and your subsequent letter of approval, we are notifying you of information required by the Division.

The Blazon #3 drill hole site was cleared after approval and drilling commenced on November 21, 1982 and continued through November 22, 1982. Breakdowns suspended drilling activities until December 9, 1982 and drilling continued to December 10, 1982. Drilling operations were terminated on December 10, 1982. The hole reached a total depth of + 106 feet in which no appreciable water was encountered.

Before abandonment of the site, the hole was plugged with commercial premix concrete from bottom to top.

Reclamation will commence in Spring 1983 when weather conditions permit access to the site without further damage to the surrounding environment. The Division will be notified when this phase is complete.

Sincerely,

SANDERS EXPLORATION, LIMITED
