ATTENTION: Mr. Cleon B. Feight, Director

Gentlemen:

This letter transmits three copies of the report "Hydrologic Information For Sedimentation Pond For King VI Mine 42" Overland Conveyor Belt" for your review and approval. Your Division recently approved a report covering the hydrologic system and sedimentation pond for run-off control from the surface facilities of this same King VI Mine. This report is an addition to the surface facilities requirement. It pertains to the hydrology requirements generated by the proposed 42" wide overland conveyor belt, storage pile and load-out station.

Included with the report are drawings numbered EST 43-79-G2, G3 and G4 which become an integral part of this presentation and will be used by U. S. Fuel Company as general arrangement drawings.

If there are any other items of information you may need in regards to this report and hydrology system phase, contact us.

Very truly yours,

Charles J. Jahne
