Re: ACT/007/011  
Stipulation 7-81-5-H

Attention: Mr. James W. Smith, Jr.  
Coordinator of Mined Land Development

Gentlemen:

In response to your letter of August 17, 1981, I am enclosing three (3) copies of a drawing delineating the watershed areas involved in the United States Fuel's King VI Overland Belt Project. The areas shown were used in the computations for the 0.6 acre feet sedimentation pond; the cross sections of the diversion ditch and the cross sections of the run-off ditch on the north side of the South Fork Canyon road.

The reports from Vaughan Hansen and Rollins, Brown and Gunnell, Inc. were used in getting the approval for the existing sedimentation pond which handles the run off from the portal area of the King VI Mine. The map is an enlarged view of the South Fork of Miller Creek area taken from the noted U.S.G.S. quadrangle noted on the drawing.

If you have any other questions, please contact me.

Very truly yours,

*Charles J. Jahne*
