Memo to Coal File:

RE: Hiawatha Complex
ACT/007/011

This minesite was visited on October 7, 1980, by Mary Ann Wright of the Division for the purpose of viewing reference areas chosen by Chris Call of Bio West. Mr. Call directed a tour of a number of the sites which had been chosen. The following sites were viewed and/or walked over.

- #6--Mixed conifer, Mohrland Canyon
- #7--Mixed conifer for mine portal site, Mohrland Canyon
- #8--Pinyon-juniper (South aspect), Mohrland Canyon
- #9--Riparian, Mohrland
- #10--Sagebrush, Mohrland
- #11--Pinyon-juniper (North Aspect), Mohrland

Several other reference areas were sampled for and established by Hiawatha. These areas were not checked since Mr. Call seemed to have carefully chosen the six areas which were viewed.
