Mr. D. Wayne Hedberg
Division of Oil, Gas and Mining
3 Triad Center, Suite 350
Salt Lake City, Utah 84501

FILE COPY

Dear Mr. Hedberg;

In response to your August 21, 1987 letter, U.S. Fuel Company is providing the requested information.

- Stipulation UMC 817.23 (1) JSL

An updated copy of Exhibit III-3 which includes cross-section D-D is enclosed

- Stipulation UMC 817.42 (1) KW

A map (F-540) showing the proposed refuse pile expansion area with the diversion ditches and sediment pond is included.

- A revised narrative is also included.

The material presented in this enclosure is designed to be inserted into the PAP as appendix III-15. Eight copies are enclosed.

Please be aware that due to the time of the year, work on the expansion may be delayed in part or even postponed by weather. Therefore, the configurations depicted on the maps may not represent what is actually on the ground. We felt it was better to delay sending revised maps until work was underway but we have been advised by members of the technical staff to submit the requested information or risk losing the project approval.

Please call if you have any questions concerning our submittal.

Sincerely,

Jean Semborski
