355 West North Temple Suite 350
Salt Lake City, Utah 84180-1203

Dear Rick;

Enclosed please find U.S. Fuel's revised drawing for the Middle Fork Sediment Pond. As we discussed briefly we are submitting the revision for approval as a step in the abatement of NOV 87-17-4-4, 30F4 issued by Lynn Kunzler. We feel greatest benefit will be derived from retaining the inlet in it's existing location, raising and moving the primary decant inlet and relocating the emergency spillway.

As we need to work within a limited timeframe, we would appreciate your response to this plan as soon as possible.

Sincerely,

Jean Semborski
Environmental Coordinator
