

0006

July 27, 1987

TO: File
FROM: James Leatherwood *JL*
RE: Additional Refuse Storage, United States Fuel Company,
Hiawatha Mines Complex, ACT/007/011-87A, Folder No. 2,
Carbon County, Utah

The above mentioned plan, submitted June 19, 1987, has been reviewed and found not to be complete. The following information must be addressed.

UMC 783.24 Maps: General Requirements - JSL

Exhibit 111-3 must be updated to include the delineation of the proposed topsoil stockpile. Please include cross sections of the stockpile configuration and berm.

UMC 817.22 Topsoil: Removal - JSL

A comparison cannot be made between the proposed disturbance area and site A borrow soil materials. Exhibit V111-4A contains the analysis of borrow area A, but the soil analysis data is unfortunately illegible. Please resubmit the data in the table presented in Exhibit V111-4A.
