RE: Conditional Approval of Proposed Extension to Existing Refuse Storage Area (dated May 29, 1987), United States Fuel Company, Hiawatha Mine Complex, ACT/007/011-87A, Carbon County, Utah

SUMMARY

The above applicant proposes increasing the size of the refuse pile to accommodate approximately 2 additional years of refuse from the Hiawatha operation. This expansion will increase the height of the existing refuse pile, and disturb 2 additional acres of land. All disturbances appear to be within the existing diversions and all waters from the disturbed area will discharge into the sediment pond. This proposal should be approved with the following condition:

UMC 817.42-1-KW

The Division requires the submittal of a map showing the proposed refuse storage expansion with the existing diversion ditches and sediment pond. This map should be submitted to the Division within 45 days of this approval date.
