DIVISION OF  
OIL, GAS & MINING

Dear Sue:

In response to your letter date Sept. 20, 1989, U.S. Fuel is submitting a schedule for reorganization of the existing mining and reclamation plan chapters according to the new regulation format. The chapters will be reorganized and submitted at three month (approximately) intervals. Maps will be submitted with the corresponding chapters as they are revised. Please keep in mind some chapters may prove more difficult than others and the schedule should be used as a guideline rather than as an obligation subject to enforcement action. However, the last chapter will be submitted no later than Aug. 30.
