Re: MID-PERMIT TERM REVIEW RECLAMATION PLAN REORGANIZATION

Dear Daron:

Enclosed for review are three copies of revised Chapter VIII (Bonding and Insurance) formatted to the new regulations. The reclamation cost estimate has been revised to account for changes during the past permit term. Costs were reevaluated in more detail and to more closely conform to our reclamation plan. Some facilities such as the proposed unit train loadout have been deleted from the cost estimate. Other reclamation operations such as hauling topsoil to North Fork have been added. The net result is that the cost has been reduced. I realize the Division will not welcome an adjustment on the down side, however, a review of the estimate should show that it is justified. The revised maps included in this submittal are required for the reclamation cost estimate but are part of Chapter V (Engineering).

Sincerely,

Robert Eccli
