Re: Permit Renewal Deficiencies, U. S. Fuel Company, Hiawatha  
Mines Complex, ACT/007/011

Dear Daron:

As of this date I still have not received finalized information from our consultants on the soils and vegetation sampling conducted in response to our permit renewal deficiencies. I have been assured that the soils information will be provided this week, however, the vegetation information probably will not and this will cause us to miss the Sept. 30 deadline. We are prepared to ship the permit documents shortly after the vegetation information is received but since I can not say exactly when that will be I am asking for another one month extension, until October 30.

Sincerely,

*Robert Eccli*
