Re: Request for Permit Amendment (Portable screening, crushing and blending facility), U.S. Fuel Company, Hiawatha Mines Complex, ACT/007/011

Dear Daron,

Enclosed is a request for a Permit Amendment to include the use of a portable screening, crushing and blending facility in the coal processing portion of the permit area.

Enclosed are 12 copies of the amended narrative and maps.

If you should have any further questions or comments please feel free to contact me. Thank you for your time and consideration.

Sincerely yours,

Mike Baum  
President

Re: Request for Permit Change, U.S. Fuel Company, Hiawatha Mines Complex,  
ACT/007/011

Dear Mr. Haddock:

As per our Permit Change request of August 12, 1993, relating to alternative topsoil borrow sites, please find three copies of each of the following plan revisions.

1. Revised narrative to Chapter II (Soils). Revisions have been made to the Operation Plan and to the Reclamation Plan. Pages that have been revised are dated 09/07/93. Since most of the page numbers in this chapter have changed, the complete chapter (less appendices) is included.
2. Additions to Appendix VII-10 (Hydrology). This appendix includes sediment and erosion control designs for Alternative Topsoil Borrow Sites E and F.
3. Revised Exhibits II-1 and II-4 (Soils); Exhibit III-1 (Vegetation); and Exhibit V-13 (Engineering).

We will send additional copies upon approval by your office.

Lab soil sample analysis sheets are also inclosed. Although sample analysis results have been summarized in the Plan, the originals may assist the person who reviews the soil information.

As noted in my earlier letter, we are hoping to begin placing topsoil on a portion of Slurry Pond No. 4 this fall, so a speedy review of this information would be appreciated.

Sincerely,

Michael W. Baum  
V.P. & Gen. Mgr.
