DIVISION OF OIL GAS & MINING  
FIELD VISIT FORM  
TECHNICAL

Date : November 13, 1996  
Time: 9:00 a.m. to 9:30 a.m.  
Mine: Hiawatha Mine  
File Number: ACT/007/011 folder # 2  
DOGM Staff: Robert Davidson and Paul Baker  
Other Attendees: Casey Jones, U.S. Fuel Company

**Purpose:**

Check on soil salvage of A and B horizons during the initial stages of soil borrow in Borrow Area "A".

**Observations:**

The area was initially stripped of sagebrush and vegetation prior to removing the top 12 inches of soil. The stripped topsoil has been temporarily stockpiled on top of the old stockpile and in the lower southwest corner of the borrow area. Topsoil on the western half of the equipment storage area is in process of being salvaged. Casey said that they still need to remove additional topsoil in this area. Subsoil has been piled in the lower southeast area and ready for transport to Slurry Pond #5.

**Recommendations/Conclusions:**

It appears that soil borrow operations are following the MRP.
