## DIVISION OF OIL GAS & MINING FIELD VISIT FORM TECHNICAL

**Date :** April 3, 1997

**Time:** 10:00 a.m.

**Mine:** Hiawatha Complex, Folder #2

**File Number:** ACT/007/011

**DOGM Staff:** Steven Johnson, Susan White, Joe Helfrich, and Wayne Western

**Other Attendees:** K.C. Jones, (Mike Watson, in an office meeting)

**Purpose:**

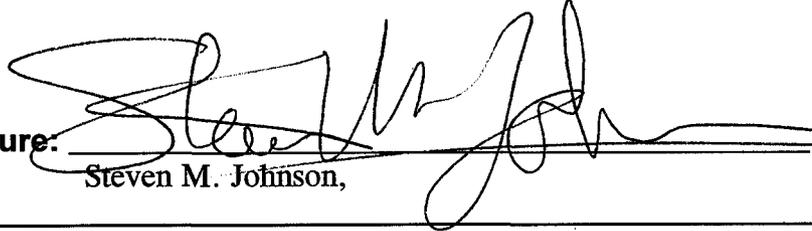

Evaluate reclamation status of Slurry Pond 5

**Observations:**

U.S. Fuel is preparing to spread topsoil on certain areas that should not require additional grading on Slurry Pond 5. The pond's drainage system is in need some repair in areas where ditches have been graded such that a berm has formed between the ditch and the refuse pile. Otherwise, drainage from Pond 5 was good.

**Recommendations/Conclusions:**

Pond 5 appears to be ready for topsoil in some finished grading areas. The incidental ditch berms must be removed as soon as possible, but should not cause a problem in the short term.

**Signature:**  on April 7, 1997  
Steven M. Johnson,
