Department of Natural Resources

MICHAEL R. STYLER
Executive Director

Division of Oil, Gas & Mining

JOHN R. BAZA
Division Director

JON M. HUNTSMAN, JR.
Governor

GARY R. HERBERT
Lieutenant Governor

Table with 2 columns: Representative Name, Title. Includes Mark Reynolds (Resident Agent) and Joe Helfrich (Environmental Scientist III).

Inspection Report

Table with 2 columns: Field Name, Value. Includes Permit Number (C0070011), Inspection Type (COMPLETE), Inspection Date (Thursday, December 08, 2005), Start Date/Time (12/8/2005 10:00:00 AM), End Date/Time (12/8/2005 2:00:00 PM), Last Inspection (Tuesday, November 29, 2005).

Inspector: Joe Helfrich, Environmental Scientist III

Weather: cold, 13, sunny, no wind

InspectionID Report Number: 807

Accepted by: whedberg
12/21/2005

Permittee: HIAWATHA COAL CO INC
Operator: HIAWATHA COAL CO INC
Site: HIAWATHA MINE COMPLEX
Address: PO BOX 1245, HUNTINGTON UT 84528
County: CARBON
Permit Type: PERMANENT COAL PROGRAM
Permit Status: ACTIVE

Current Acreages

Table with 2 columns: Acreage, Description. Includes Total Permitted (12,177.00), Total Disturbed (290.00), and Phases I, II, III.

Mineral Ownership

- Checked: Federal, State, Fee
Unchecked: County, Other

Types of Operations

- Checked: Underground
Unchecked: Surface, Loadout, Processing, Reprocessing

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The purpose of this site visit was to conduct a complete inspection of the Hiawatha complex. The site remains inactive with the exception of periodically loading slurry fines on to rail cars from the #1 slurry pond. Cold weather and recent storms have deposited a foot of snow in some areas of the complex limiting access to portions of the property.

Inspector's Signature

Date Friday, December 09, 2005

Joe Helfrich, Environmental Scientist III

Inspector ID Number: 1

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas and Mining.

REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

1. Substantiate the elements on this inspection by checking the appropriate performance standard.
 - a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable.
 - b. For PARTIAL inspections check only the elements evaluated.
2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
3. Reference any narratives written in conjunction with this inspection at the appropriate performance standard listed below.
4. Provide a brief status report for all pending enforcement actions, permit conditions, Divison Orders, and amendments.

1. Permits, Change, Transfer, Renewal, Sale

The mid-term review has been approved. There are no other amendments pending. The DOGM permit was issued on March 14, 2002 and expires on March 14, 2007. Other documents include the following:

- Certificate of Insurance by Scottsdale Insurance Co. Policy # CLS0668789 effective 01/27/04 and expires 1/27/06.
- UPDES Permit UT-0023094 issued 10/01/2004 and expires 09/30/2009 at midnight.
- Air Quality Permit BAQE-502-89 issued 07/25/1989 and remains in effect.
- Bond is an irrevocable letter of credit issued by Bank One in the amount of \$2,838,000.

2. Signs and Markers

Signs containing the required information were posted at points of access to the mining facilities.

4.a Hydrologic Balance: Diversions

The water in the drainage ditch that collects undisturbed flow from the left fork of the King 4 and 6 mine yard was frozen. The majority of this flow originates from a spring approximately 200 yards above the mine site along the upper bank of the logging road. This drainage ditch connects with a 36" CMP (25) that discharges below the sediment pond. This culvert has been repaired near the toe of the outslope of the mine yard pad. Diversions at the other mining facilities were found to be in working order.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Sediment ponds at the King 4, 5, 6, and the ones below the slurry ponds contained snow from recent precipitation events. They appeared to be functioning properly and were in working order at the time of the inspection. They were inspected on 8/15/05 showing no signs of erosion or instability.

4.c Hydrologic Balance: Other Sediment Control Measures

There are a number of ASCAs throughout the complex that represent alternative sediment control in lieu of a larger structure such as a sediment pond. They appeared to be functioning properly and were also in working order at the time of this inspection.

4.d Hydrologic Balance: Water Monitoring

Hard copies of the second quarter water monitoring data were available for inspection. Second quarter samples were taken on July 7, 2005. The data has been entered into the Division's database.

4.e Hydrologic Balance: Effluent Limitations

DMR's were current through November of 2005.

7. Coal Mine Waste, Refuse Piles, Impoundments

The slurry impoundments and the refuse pile were inspected on 11/19/05 showing no signs of weakness or instability.

9. Protection of Fish, Wildlife and Related Environmental Issues

Deer, Elk, and Rabbits have been feeding on the vegetation throughout the mine site.

15. Cessation of Operations

The operation is inactive with the exception of the slurry removal from the #1 slurry pond.

16.a Roads: Construction, Maintenance, Surfacing

The roads throughout the site were in good repair and snow packed.

19. AVS Check

Updates to the ownership and control information were provided in the annual report.

20. Air Quality Permit

Air Quality Permit BAQE-502-89 was issued 07/25/1989 and remains in effect.

21. Bonding and Insurance

The bond is an irrevocable letter of credit issued by Bank One in the amount of \$2,838,000. The insurance is current through 1/27/06. A copy of the Insurance was available for inspection at the Division's office in Salt Lake.
