1. Permits, Change, Transfer, Renewal, Sale

The DOGM permit was issued on March 14, 2002 and expires on March 14, 2007.

2. Signs and Markers

Signs containing the required information were posted at points of access to the mining facilities. At the time of this inspection, all points of access to the Hiawatha complex were open.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

The ponds at the King 4 and 6 and 5 operations were inspected, they appeared to be stable showing no signs of erosion. All were dry at the time of this inspection.

4.c Hydrologic Balance: Other Sediment Control Measures

The diversion below the slurry pond should be cleaned of coal fines annually.

4.d Hydrologic Balance: Water Monitoring

This information was sent to Mr. Reynolds by way of "E" mail on 8/23/06 by Dave Darby, hydrologist for the Hiawatha complex.

"During our review of the water monitoring data submitted for Hiawatha Coal Mine, it has become apparent that several sites have not been reported and several of some parameters have not been reported on a monthly basis. I am sending you a file depicting the reported data (data in the DOGM Water Quality Database). Please review it. I want to discuss it with you by the end of this week. If you feel the need, I can meet with you and go over the monitoring requirements as listed in your MRP to ensure all future data is submitted.

There are four working tables showing missing and questionable data, permit requirements, regulatory requirements, and Table 7-16 parameter requirements."
