Mark

During our review of the water monitoring data submitted for Hiawatha Coal Mine, it has become apparent that several sites have not been reported and several some parameters have not been reported on a monthly basis. I am sending you a file depicting the reported data (data in the DOGM Water Quality Database). Please review it. I want to discuss it with you by the end of this week. If you feel the need, I can meet with you and go over the monitoring requirements as listed in your MRP to ensure all future data is submitted.

There are four working tables showing missing and questionable data, permit requirements, regulatory requirements and Table 7-16 parameter requirements. You access them by clicking on the tabs at the bottom window.

Please contact by phone, 1 801 538-5341.
