Hello Mark,

I just wanted to touch base with you after our midterm inspection. We are finalizing our memos and just waiting on one more from Pete Hess with respect to any bonding issues. Once all the memos are in, we'll be issuing our letter summarizing our midterm findings what we feel requires some attention at the Hiawatha site.

Secondly, it appears that we have not received the annual reports from either Bear Canyon or Hiawatha. I know you mentioned that you were under the impression that they did get sent in, but it appears that they have not. Could you look into it and let us know the status?

And finally, I had a chance to speak with the Curator of the Utah Core Research Center, Mike Laine about the cores that you indicated are located on the Hiawatha premises. Mike and Dave Tabet at the Utah Geological Survey appear to be very interested in what you might have onsite. Would it be alright if I gave Mike your contact information so he can call you to discuss?

Thanks so much...have a great day.

April
