1. Permits, Change, Transfer, Renewal, Sale

The permittee had a person escort me throughout out the property today. There is a possibility that portal areas of Hiawatha maybe part of the court settlement of Bear Canyon. If so, there would be need for a partial transfer of the Hiawatha permit to the new owners of the Bear Canyon Permit.

3. Topsoil

Some of the topsoil piles were inspected with no signs of wind or water erosion.

4.a Hydrologic Balance: Diversions

Some of the diversion had sediment and will need clear out in the near future. Water is going through the #4 and #5 Mine pad area in a uncontrol manner. This area is under Hiawatha Coal permit but a court settlement may have given this area to new owners of Bear Canyon. Next month I will gather more information from the Hiawatha permittee. He was not available for this inspection.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Sediment ponds were basically dried and no hazardous conditions were noticed.

8. Noncoal Waste

The permittee had cleaned up several areas of old mining equipment.

15. Cessation of Operations

No activity at the slurry ponds were noticed.
