Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

The entire mine site is now snow covered. Remote locations of the mine site are now inaccessible. A light blanket of snow covers the lower elevations of the mine site and the snow increases in depth the further up the canyons that are also part of the mine permit area. The site is idled and therefore the roadways are not plowed.

2. Signs and Markers

The mine identification signs are still posted. On the prior inspection it was noticed that the information on the identification signs is incorrect. Nov # 14148 was issued. The operator has contacted a sign manufacture and made arrangements to get new signs..

5. Explosives

There are no explosives stored on the mine site.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile appears stable. No visible hazards were observed during the inspection of the refuse pile area. Some of the road ways near the refuse pile have been graded since the prior inspection.
