OPERATOR COMMENTS

The Hiawatha Mine Complex continues in temporary cessation at least until the year 2024. No mining is projected in the next 5 years. No coal fines were removed from coal waste areas in 2018. Road conditions remain unchanged with the exception of final repairs from previous forest fire related flooding damage in Middle Fork. Repairs were completed on the Middle Fork sediment pond and other structures as well as several other sediment pond cleanouts and recertifications in 2018. The property appears to have stabilized from the former forest fire damage. Water monitoring data has been submitted quarterly and is available in the UDOGM water database for review.
