Good morning,

I've spoken to both Priscilla and Charles about the substitute topsoil pile/gun range protection deficiency identified in the Hiawatha midterm (due to DOGM on December 2nd).

Based on those conversations, here's my understanding of where we're going:

- 1) Charles will provide (via email) a draft response to Priscilla's aforementioned deficiency prior to her return from Thanksgiving vacation on Monday the 2nd.
- 2) On Monday December 2nd, Priscilla can take a look at it and get with Charles to see if there are any tweaks or revisions that could be made to the language.
- 3) Following those discussions, Charles will submit the midterm response the following day on December 3rd.

I'm totally o.k. going an extra day on receiving the midterm response in order to allow Charles and Priscilla an opportunity to discuss (and hopefully resolve) her deficiency. Priscilla has already left for Thanksgiving break and so Monday the 2nd is the earliest that folks can talk. I'm happy to facilitate a path forward, but as the author of the deficiency, Priscilla obviously needs to weigh in on this.

Warmest regards and a Happy Thanksgiving to everyone!

Steve
