Subject: 0070011. Timeline for Hiawatha pond maintenance

To: Charles Reynolds <charles.reynolds@hiawathacoal.com>, Steve Christensen <stevechristensen@utah.gov>

Cc: Kendra Hinton <khinton@utah.gov>, Dana Jenkins <hannahsknight@yahoo.com>

During our conference call today, we agreed that Ponds 009 and 011 in South Fork and Pond 008 in Middle Fork and Pond 004 below the Upper Rail Yard were top priority. Below is the schedule agreed upon for maintenance of those ponds.

On or before:

September 30, 2021.

- HCCI will pump water from South Fork upper pond 011 and Middle Fork pond 008; know the sediment level in those ponds; and get the decant and spillway functioning in both ponds.

On or before

October 23, 2021:

- HCCI will remove some sediment from pond 011 and pond 008 to increase drainage from saturated sediments in those ponds.
- HCCI will excavate sediment from the South Fork lower pond 009 and the Upper Rail Yard pond 004; know the sediment level in those ponds; and get the decant and spillway functioning in both ponds.

On or before November 23, 2021:

- HCCI will excavate pond 011 and pond 008.

Hiawatha Coal Co, Inc. (HCCI). will provide weekly progress updates to the Division either by phone or email. (Division will facilitate a conference call weekly.)

Pond sediments will be stockpiled on a nearby pad, contained with sediment control, and will be sampled for use as substitute topsoil. Stockpiles and by-pass catch basin excavations will be added to the plan using the amendment process.

Charles and Dana, we appreciate your efforts thus far. Thank you.
