Pittsburgh, PA. 15230

Gentlemen:

This Division would like to request copies of U.S. Steel's NPDES monitoring reports at the same frequency as required by its NPDES permits.

If there is any charge for these reports, please bill the Division at the above address. Also, please send these reports to the attention of Ron Daniels.

Thank you,

*Toni Butterfield*

Mr. Cleon Feight, Director  
State of Utah  
Division of Oil, Gas, and Mining  
1588 West North Temple  
Salt Lake City, Utah 84116

Dear Mr. Feight:

This letter is to notify you that United States Steel Corporation's Utah coal mining facility is presently in compliance with the provisions of the Federal Water Pollution Control Act (FWPCA) and its regulations. For your information an enclosure has been provided which identifies the current National Pollutant Discharge Elimination System (NPDES) permit which authorizes waste water discharges from USSC's active coal mining facility. We believe that USSC meets the OSM effluent limitations, monitoring, and reporting requirements through its participation in the NPDES program. Upon request, USSC will provide copies of its NPDES monitoring reports at the same frequency as required by its NPDES permits. Requests for these reports should be made to United States Steel Corporation, Environmental Control Department, 600 Grant St., Room 5953, Pittsburgh, Pennsylvania 15230.

*Request this.*

It is requested that your agency coordinate with Environmental Control and the Western District Chief Engineer concerning matters pertaining to the administration of OSM regulations as they are applicable to U. S. Steel Corporation coal mining facilities.

Very truly yours,

RLA:mjh
