RE: Topsoil Protection  
Wellington Prep Plant  
ACT/007/012  
Carbon County, Utah

Dear Mr. Watts:

This is to confirm the verbal approval for the species used for topsoil stockpile protection at the Wellington Prep Plant.

The species and amount per acre agreed upon as discussed during our November 30, 1981, telephone conversation, were crested wheatgrass (Agropyron cristatum) at two pounds Pure Live Seed (PLS)/acre, tall wheatgrass (Agropyron elongatum) at three pounds PLS/acre and yellow sweetclover (Melilotus officinalis) at one to one and one half pounds PLS/acre.

Should any problems arise in obtaining this mixture, please contact me.

Sincerely,

LYNN M. KUNTZLER  
RECLAMATION BIOLOGIST
