RE: Administrative Completeness
(Mine Name)
(ACT/000/000)
Folder Nos. 2 and 3
(County) County, Utah

Dear (Name):

(Company Name and date of response) response to the Division's Administrative Completeness Review letter of December 6, 1982 has satisfied our request for additional information not addressed in the original permanent program permit application. Therefore, the Division hereby finds the mine plan permit application to be administratively complete, in that all areas of concern appear to have been addressed.

This determination will allow (Company Name) to temporarily continue mining operations under the existing interim State permit according to provisions of Federal and State statutes and regulations until such time as the review of your company's permanent permit application is completed.

An in-depth Apparent Completeness Review (ACR) has recently been conducted in order to determine the sufficiency of the application and the Division is currently awaiting your response to the deficiencies noted in the ACR in order to proceed with the review process according to an established priority schedule.

Though no further response to the cursory administrative completeness review, nor a publication of completeness, is required at this time, the Division would appreciate being notified in writing of any significant circumstances that may exist or develop in the near future which could affect the Division's review priorities that have been established. Your continued cooperation is appreciated. If you have any questions, please don't hesitate to call.

Sincerely,

JAMES W. SMITH, JR.
COORDINATOR OF MINED
LAND DEVELOPMENT
