Re: Status of Vegetation Test Plots
ACT/007/012 #2
Wellington Coal Cleaning Plant

Dear Dianne:

Per our conversation, this letter is to provide an update of the progress of work on the vegetation test plots. As evidenced by the attached correspondence, the contract specification was forwarded to headquarters engineering on October 1, 1984 and then to the purchasing department on October 5, 1984. On October 1, a purchase order was placed with Mt. Nebo Scientific covering the final seed bed preparation and planting. Mt. Nebo Scientific is making final arrangements for ordering soil amendments and seed for the "Surface Facility" test plot.

U. S. Steel Mining Co., Inc. is anticipating some idle plant time during the month of October. It is my intent to use plant forces to work on the surface facility test plot. As of the date of this letter the plot has been leveled and ripped. One week of time available for work was lost because of rain.

Sincerely,
Glenn H. Sides

Glenn H. Sides
General Superintendent
