Inspection Memo
to Coal File:

RE: Geneva Mine
ACT/007/013, Folder #7
Wellington Preparation Plant
U. S. Steel Corporation
ACT/007/012, Folder #7
Carbon County, Utah

In response to a request of OSM inspector Frank Atencio, Sandy Pruitt DOGM, visited the Wellington Plant office on March 5, 1984 to verify that water monitoring data from the Wellington Plant area and Geneva Mine for the last quarter of 1983 were available for inspection as required. All water monitoring data up to January 13, 1984 were available for the Wellington Plant and monitoring data up to November 18, 1983 for the Geneva Mine was up to date and available as required. No compliance problems were detected upon a cursory review of this data. Copies of the monitoring reports were forwarded to OSM.

Sandy Pruitt 
Field Specialist
