RE: Temporary Tar Sands Loadout  
at the Wellington Wash Plant  
ACT/007/012

Dear Mr. Braxton

Kaiser Coal is contracting with AMOCO Production Company to provide a track siding where AMOCO can load out a 1000 tons of tar sands from the Sunnyside deposit. A ramp constructed of concrete blocks will be used to allow direct dumping into rail cars. The site for the ramp will be approximately 200 feet south southwest of the preparation plant at Wellington. Construction of the ramp will be during the week of July 7th. Loading will start on July 14th. After the loading is complete the ramp will be removed.

If you or your staff have questions, please contact this office at the above address or call at 888-4421.

Sincerely,  
Kaiser Coal Corporation

Douglas C Pearce  
Mine Engineer
