Dear Mr. Whitehead:

Re: Reclamation of Disturbed Area at the Wellington
Prep. Plant, Ref. Violation No. N87-17-5-1

The area in question shall be reclaimed using the approved methodologies set forth in the Wellington ORP. The approved seed mix, Table 17, Appendix I, of the Wellington ORP shall be used. Revegetation of the disturbed area shall be completed by the fall of 1988.

As a stop-gap measure to treat the runoff from the disturbed area, a silt screen fence was erected; and if this meets your approval, it shall remain in place as a permanent sediment control structure. The disturbed area is approximately one and a half acres in size, and the silt screen fence should be adequate.

Enclosed is a copy of the permit area for the Wellington Prep. Plant. The map shows the general location of the disturbed area. At a later date (by January 8, 1987), a revised map of the exact location will be provided.

If you have any questions, please call.

Sincerely,

B. Grosely
Mine Engineer
