re: Notification of Resumption of Operation
-Wellington Load-Out-
ACT/007/012

Dear Ms. Linner:

In accordance with stipulations contained within the Permit Transfer Approval received October 10, 1989, Genwal Coal Company wishes to notify the Division that processing operations will be resumed at the Wellington Load-Out Tuesday, November 28, with the first train loading scheduled for December 5.

During the past week, various units of the screening plant have been operated individually and collectively in a test mode to determine their mechanical and electrical suitability; during this time, some small amounts of coal (approximately 500 tons) have been processed to determine screen performance. All hydrologic structures were in place prior to this testing of equipment.

Construction of the load-out system should be completed about Thursday, November 30, with testing of this system scheduled for December 1; train loading on December 5 will constitute full operational status.

Sincerely

COAL SYSTEMS, INC.
