Re: Wellington Preparation Plant
Permit ACT/007/012

Dear Mr. Braxton,

Transmitted herewith is the November 1, 1989 revision of Genwal Coal Companies "Application for Permit Revision and Incidental Boundary Changes". The revision was necessary to comply with a variance to proceed with construction at the Wellington Coal Loadout Site. In addition to minor labeling changes, please note the following more significant changes.

- o The sediment pond was modified during construction due to encountering a perched water table (This change was previously approved.);
- o A new section explicitly addresses our proposed small area exemptions;
- o The calculations section has been added to show the design of each hydrogic structure separately;
- o The issue of "topsoil" on the UD-1A ditch is addressed under the topsoils section.

We would like to proceed with the UD-1A construction as soon as clearance can be given. Please fax a copy of the approval as soon as possible and mail the original. If revisions are necessary, please let us know immediately.

Sincerely,

COAL SYSTEMS, INC.

Bradley C. Paul, Ph.D
Mining Engineer
