Attention: Mr. Rick Summers

Dear Mr. Summers:

As per our conversation on August 28, 1989, Genwal Coal Company is formally requesting permission to switch from baseline to operational parameters for the surface water monitoring program at Wellington. Our records indicate that there are more than the required two years of continuous data required to switch from baseline to operational.

Also, during our conversation it was agreed that Genwal Coal Company will monitor flows in the Price River only at the downstream location unless our current proposed operation changes and there is potential for discharge.

We would like to implement these changes effective this sampling quarter. We expect to sample the last week of September; therefore, we will be awaiting your approval.

Sincerely,

Dennis / Schuch for *Phil Gray*
