Re: Ground Water Wells
Wellington Facility

Dear Mr. Summers,

Coal Systems, Inc. has conducted a search with the State Engineer's Office and also with Engineering Sciences to locate information regarding the construction of the ground water wells at the Wellington Load-out Facility. It should be brought to your attention that we communicated with the Salt Lake and Denver offices of Engineering Sciences and were unable to locate any further information on the wells. Please find enclosed a copy of a letter from Engineering Sciences regarding their inability to locate the necessary information.

At this time, we will continue on an alternate plan with Earth Fax to collect more information through various procedures to more accurately identify the necessary information to present a proper PHC.

Sincerely,

COAL SYSTEMS, Inc.

Sterling Stoddard
Staff Engineer
