Carbon County, Utah
- Baseline Information and Hydrology -
Operation and Reclamation Plan

Dear Mr. Haddock:

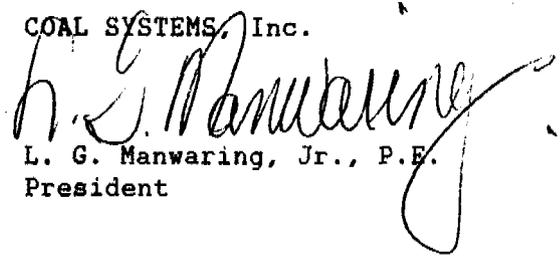

Transmitted forthwith are three (3) copies of the reorganized and reformatted Operation and Reclamation Plan (ORP) for the Wellington Preparation Plant. As per Permit Renewal Stipulation UMC 788.14-(1)-SCL (December 1989), this submittal includes the revised baseline information and baseline hydrology report of the reorganized ORP. According to this Stipulation and schedule, pertinent information regarding operation design details, reclamation plans and bond calculations will be forthcoming at later dates, as specified.

As you will note in your review of this submittal, the revision of baseline information and master outline for the remainder of the ORP have been accomplished according to the new (rewritten) Coal Mining Rules, effective April 12, 1990. In addition, the most current available information and data have been incorporated into the revised ORP wherever applicable.

Should you have any questions regarding this submittal or if you find any areas where additional information is required, please notify us at your earliest convenience. Thank you for your continued cooperation and assistance on this project.

Sincerely,

COAL SYSTEMS, Inc.
